1. General

1.1. Product version

6.0.1

1.2. Date of release

11th July 2013

1.3. Target audience

This document is for technical users of Bonita BPM.

2. Functional update

2.1. Bonita BPM Studio

2.1.1. Naming update

In actor filter definition, for better understanding,

The filter called "same-task-user" in 6.0 has been renamed by "task performer" in 6.0.1

The following description has also been added: "that filter uses a task name and returns the user who performed it"

2.1.2. SAP jco2 connector

The SAP connector can be used to call an SAP function (BAPI, RFC or ZBAPI).

The advanced wizard provides auto completion capabilities.

2.1.3. Start timer condition

New dialog that enables the user to graphically pick a date, define a cycle or a duration without coding.

In case of cycle, a cron generator automatically generates the resulting cron expression.

User can edit the expression if necessary.

2.2. Bonita BPM Engine

2.2.1. SQL Server

Improvements on the SQL Server have been done.

2.3. Bonita BPM Portal and form

To provide a better visibility in the report, a screen shot has been added in right column of the report.

A loader has been added in the form and in the report during loading.

3. Technical changes

3.1. Deployment

The LDAP synchronizer is now included into the BonitaBPMSubscription-6.0.1-deploy.zip package

4. Bugs fixed

4.1. Bonita BPM Engine

Summary

- ENGINE-1330 IdentityAPI: user membership not paginated
- ENGINE-1363 After import organization, membership of users is not updated
- ENGINE-1398 StartIndex and maxResults are never used in getUserMembershipsByRole
- ENGINE-1421 User filter not working, throws exception
- ENGINE-1438 ExpressionEvaluationException when task(having external data dependency) left active for long time
- ENGINE-1451 Inexact Engine log when gateway fail
- ENGINE-1458 Data type dependencies go missing randomly resulting in 'No class def found'
- ENGINE-1459 Email connector tasks failed, appear twice
- ENGINE-1460 Confirmation message template failure
- ENGINE-1463 Re-deployment from Studio fails for an already deployed process
- ENGINE-1464 Data transient are lost after a while
- ENGINE-1466 We can't update connector implementation in the portal if the class name is not updated in the new implementation
- ENGINE-1467 Can't use data mapping on call activities if both Step Data and Process data are used
- ENGINE-1471 NullPointerException when submitting case start form
- ENGINE-1473 Engine exception on process with multi-instantiated activity (regression)
- ENGINE-1498 Dependency conflict when using same external libraries in two pools connected by call activity
- ENGINE-1526 Could not find UserTransaction in JNDI [java:comp/UserTransaction]
- ENGINE-1556 Can't start a bundle jboss
- ENGINE-1557 [SQL Server] Unexpected paginated results when searching human tasks and using a sort criterion
- ENGINE-1578 SQLServer encoding

4.2. Bonita BPM Studio

Summary

5.9/5.10 import feature

- STUDIO-2474 Actor defined in lane attribute is not well migrated from 5.x to 6.x
- STUDIO-2476 Cannot import process from 5.9/5.10 if an attachment has/had an initial value
- STUDIO-2485 Not possible to update any variable if migrated from 5.x to 6.x
- STUDIO-2361 Import from 5.9 fails with processes containing FileWidget

KPI

- STUDIO-2428 Issue with using KPI when using groovy script with the graphical editor
- STUDIO-2239 Importing an incorrect KPI file doesn't give any errors

Connector

- STUDIO-2520 Impossible to edit a saved connector configuration
- STUDIO-2525 cannot create SAP connector
- STUDIO-2535 Empty actor mapping when building bar with BonitaStudioBuilder (workspace API)
- STUDIO-2402 generated Connector .impl file does not contain main connector jar in dependency jar list
- STUDIO-2398 Edit connector configuration fails when double-clicking on a Connector
- STUDIO-2336 [connector in start form case]: LoggedUserId engine variable is not available
- STUDIO-2397 Import/Export diagram: email connector "if connector fails" problem
- STUDIO-2394 Form field name \${name} saved instead of value in database when using the connector graphic wizard

Validation

- STUDIO-2459 validation detects empty names for sequence flows but these are not mandatory

Forms

- STUDIO-2344 Read only file widget with an initial value + output operation, doesn't work
- STUDIO-2332 Preview doesn't work on a form of a task from an extracted subprocess
- STUDIO-2370 Cannot preview form with custom Look'n'feel
- STUDIO-2343 Export process problem with read only file widget
- STUDIO-2407 variables not visible when using a group in a form

Message

- STUDIO-2331 CatchMessage can catch a message from a throwEvent of the same process
- STUDIO-2319 When changing target of message Flow graphically, it is not updated
- STUDIO-2423 Message: target task list is not complete when 2 processes with same name and different version exist

Others

- STUDIO-2341 Tomcat shutdown when the network connection is lost
- STUDIO-2338 Cannot use SP Identity API through apiAccessor in Studio (SP APIAccessor returns BOS IdentityAPI)
- STUDIO-2357 When trying to import process template, throws error soap-encoding.xsd not a valid file
- STUDIO-2364 Copy/Paste feature in studio : multiple "Copy of" for transitions
- STUDIO-2391 License: wrong license error 27
- STUDIO-2420 On copying a task, the dependencies resolution doesn't get copied
- STUDIO-2437 "Download default..." failed in the Look'n'feel description
- STUDIO-2205 Special characters such as "?" "!" ' "&" should be supported to name a BPMN element

4.3. Bonita BPM Portal

Summary

Report:

- WEB-2586 Report is switching to english after selecting any element in a combobox
- WEB-2602 Reports / MySQL / Bar chart counters are always showing 1 item (case or task) when displaying several date categories
- WEB-2546 When the task is not assigned to any user, the reports assigned to shows null null
- WEB-2550 done task number & open task number are wrong at simple tasks executions
- WEB-2565 reports do not display sub tasks
- WEB-2549 Case average time export report doesn't list the cases at the bottom
- WEB-2552 When you select a from or to date in parameters of reports, the dropdown stays
- WEB-2581 Reports / Oracle database / Bar chart counters are always showing 1 item (case or task) on a daily basis
- WEB-2582 human tasks executed by system due to timeouts are not handled by reports

Mobile:

- WEB-2447 "Cancel" button is needed in pop-in
- WEB-2604 [mobile] it is not possible to create a subtask

Others

- WEB-2208 categories' title is missing in left column, in User profile
- WEB-2224 we can create a login with a space but we cannot login afterwards
- WEB-2238 related pool is missing on performed tasks in middle column
- WEB-2259 confirmation window missing in delete button for disabled apps in the middle column
- WEB-2459 Deploy bundle zip file doesn't have a top folder
- WEB-2537 login page is not translated
- WEB-2553 Archived Tasks label in reports should be replaced with Done Tasks
- WEB-2567 The language preference is not kept when you come back on the portal
- WEB-2618 [Security] attachmentImage Servlet vulnerable to bypass business logic attack
- WEB-2646 Form Level Transient Data gets over written (report 5.x fix to 6.x)
- WEB-2650 The connectors list in the Service task detailed view: It contains a list of ****ALL**** connectors of the platform
- WEB-2663 'Bonita Portal' SQUARE link not appearing on 'form app' ON FIREFOX
- WEB-2708 sub tasks calendar is broken on firefox
- WEB-2723 NPE when getting the form of the activity
- WEB-2726 on Firefox, 'Bonita Portal' does not appear as a link but as a simple text
